

UV JET PL-UV-4060

Ideal for personalised gifts or other items and easy to operate, the built-in Ultra Violet LED lamp cures inks instantly as they are printed for rock-solid, durable imprints on metal, glass, wood, stone, plastic, fabric, vinyl and more.

When printing with UV printing technology, the ink dot 'sits on top' of the media. As UV inks dry immediately when exposed to UV light, you can print on almost anything, coated or uncoated, from plastics and glass to wood and metal. Also, UV printing emits less volatile organic compounds and produces no smell.

FEATURES

- UV light source can be adjusted
- Auto height measurement
- Can print on any material directly
- Ideal for industrial production high speed printing
- Mobile and simple to use
- Shipped to you as a completely pre-assembled and factory-tested system

BENEFITS

- Low operating costs
- Easy to clean and maintain
- Ink is Waterproof, UV proof, and Scratch proof
- Finished product is suitable for outdoor use
- Can print white ink
- We hold consumables and spares in stock in Cape Town and Johannesburg

SPECIFICATIONS

Model	: PL-UV-4060	Ink Type	: UV Ink
UV Curing System	: LED UV Lamp (water cooled)	Ink colours	: C M Y K W W
Max. Print Format	: 60 x 40 cm	Ink Supply System	: Continuous
Max. Print Height	: 14 cm	Ink Consumption	: 15 ml / Square Metre
Power Required	: 50/60 Hz 220 V <20A	Interface	: USB2.0
Print Head	: Single Head (180 x 6 Nozzles)	Net Weight	: 102 kg
X/Y/Z-axis motors	: Servo Motors	Dimensions	: 135 x 90 x 60 cm
RIP Software	: Photo Print RIP	OS Required	: Microsoft XP / Win7
